Hi Greg,

I have gotten a lot of questions from LEPC/local emergency management groups about preparing and preplanning with water utilities now in light of the chemical spill here in Charleston. So I asked Patti Kay for some resources, I wasn't sure what DEP was interested in with your briefing but if they are looking more at working with the water utilities and water security I wanted to share these links.

Melissa

Melissa,

Nice to hear that others are interested in the work EPA has done on training water utilities as well as local responders.

This page contains a wealth of information:

<http://water.epa.gov/infrastructure/watersecurity/emerplan/index.cfm#pp>

Scroll down to training to see the link to the CD of tabletop exercises (third bullet under training and exercises)

Here is the exact link: <http://water.epa.gov/infrastructure/watersecurity/techtools/ttx.cfm>

Folks just need to register to be able to download the tool.

The first link above also has links to the drinking water and wastewater tailored ICS and NIMS courses.
